*From Fund inception on 5/31/13. The Russell Midcap & Russell Midcap Growth Indexes since inception performance is as of 5/30/13.

Midcap Index is an unmanaged indicator which measures the performance of the Midcap segment of the U.S. equity market. The Russell Midcap Growth Index is an unmanaged index of those companies in the Russell Midcap Index chosen for their growth orientation. These Indexes are not available for direct investment and its returns do not reflect expenses that are deducted from the Fund's returns. Dividends are considered reinvested.

Mid-cap company risk is the risk that investing in securities of mid-cap companies could entail greater risks than investments in larger, more established companies. Mid-cap companies tend to have more narrow product lines, more limited financial resources, and a more limited trading market for their stocks, compared with larger companies. As a result, their stock prices may decline more significantly or more rapidly than stocks of larger companies as market conditions change.
